## About These Release Notes

This document contains a review of the new features and latest modifications for My Vision Express Version 10.0. These are all subject to change and their inclusion in these Release Notes does not guarantee that they will be part of the final release for this version. This document was last reviewed on May 30, 2013.

---

## Upgrading to Version 10.0

The upgrade to My Vision Express Version 10.0 from previous versions implies a long list of changes which, for the most part, are outlined in these Release Notes. Before you perform this upgrade, you should read this document thoroughly and understand how the changes in this new version of My Vision Express will impact your usage of the software and your practice in general.

Contact the My Vision Express support team for help during the upgrade process at 877-882-7456 (Option 3). Please schedule your upgrade during support hours (Mon. – Fri. 8:30 AM – 7:00 PM) so that you have help available if you run into any issue.

---

## Internet Connection Required

Starting with My Vision Express Version 10.0, you will need an Internet connection to run the application. The software will periodically perform a license check which would fail without Internet connectivity. Also, many of the new features coming in this version require Internet access. Including many of those designed to help you qualify as a “meaningful user” under the EHR Incentive Program for Medicare/Medicaid.

---

## Microsoft SQL Server

Version 10.0 of My Vision Express requires Microsoft SQL Server 2008 R2 or Microsoft SQL Server 2012 to be installed in your server. If you do not have this version of SQL installed please contact our support department before upgrading.

# Fixes & Other Enhancements

---

## Orders

**KMV-339-10122** Fixed a minor calculation problem with the margin commissions.

**LMN-809-59588** Fixed a dispensing fee error where orders with Frame source "Patients Frame" were being applied a frame dispensing fee.

---

## Setup

**HQJ-238-60574** Fixed a problem with the Letters search where if the email filter is set to "Yes" patients with no emails will still appear in the search results.

The screenshot shows a search filter dropdown menu for 'E-mail' with options 'Yes', 'All', 'No', and 'Yes'. The dropdown is open, and the 'Yes' option is selected. The background shows a search form with fields for Ethnicity, Race, Zip, Smoking status, E-mail, Bad address, Referral Type, and Pref. conta.

---

## Reports

### DGK-816-95295

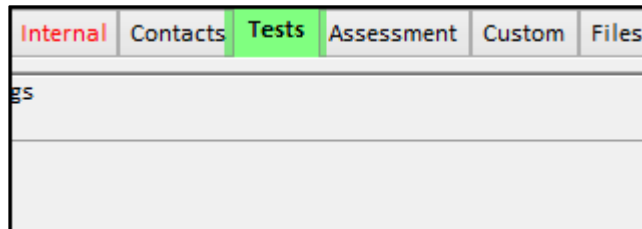

Fixed an error that would appear when clicking on the layout button in the results tab of the Audit report.

---

## Exam

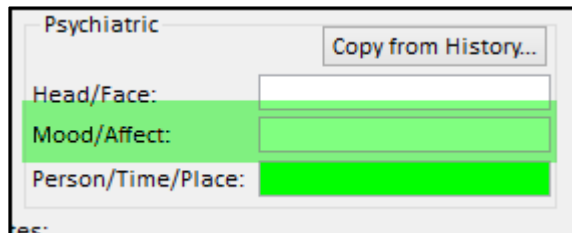

### AUQ-178-64014

The Tests tab will now also be part of the exam lock to restrict modifications once the exam is locked.

### HFR-857-34842

Exam Coder will now consider "Mood/Affect" in the Entrance tab of the exam effectively bringing a total of 14 elements being considered in the Exam Coder.

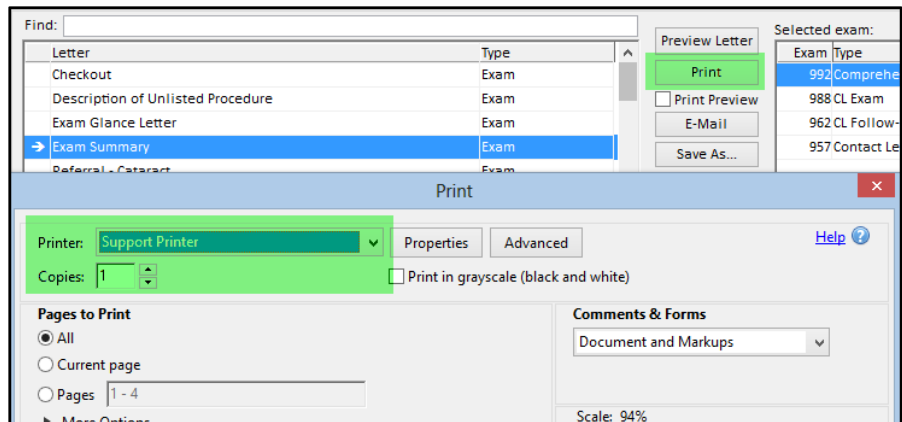

### TAX-799-38075

Fixed error that would appear when clicking on drug history link in the Eprescribe module.

**CTI-458-79646**

Fixed printer selection from Exam and all other modules when select an alternate printer it would still print to the default printer. The print setup button has been removed and replaced with a Print button that will launch the Windows Print Dialog box allowing the user to select their printer and other options.

## Insurance

**AEK-839-29857**

Fixed a filtering problem when attempt to filter claims in Batch claims module by custom claim statuses. The search was returning all claims regardless of the filter imposed on the results.
